

Several cyber security to protect your account in the social • - :networking Twitter

(s02.justpaste.it/files/justpaste/d224/a9161498/twitter.jpg//)

When you enter the network Twitter through the browser always make .1
sure you enter the correct site Twitter.com (<https://twitter.com/>) and that an
encrypted site at the beginning of the link Pal HTTPS, or green tag, and note
any marks (error) called or the appearance of a page to the testimony of
false requests "acceptance" or conversion for another site requires no
.powers or entry on your account

When using Twitter from your phone, whether "Android" or the iPhone, .2
prefer to use the official Twitter application for its effort in Twitter of
encryption applied, and then downloaded from the official Apple Store or
.Google Play, not only of the sites and forums

Make sure your account is linked to Twitter actually private Baamelc, and .3
make sure your ability to access e-mail, so that you can retrieve the account
.in case of a breakout or arrest

Make sure you use the word difficult and complex passage, and it must .4
.be different from the password via email

Enable the "request personal information when you request to reset your password," or so-called "Request Personal Information" section of the settings in the Twitter option, so as to put an obstacle to attempts to penetrate your account

When you use an application Twitter official in the phones prefer to activate the "Login Verification" option from the account settings and then "Security" in order to stop hackers from using your account even if actually got the password, because it is activating this option you will be asked Twitter authorization to enter into a time the intervention of new Twitter, also remember to save backup codes that will give you Twitter, but you can not even access your account in the event of the loss of your device or if it is closed

Do not make any unwanted applications from being able to use your account, as applications automated Twitter and statistics and the Qur'an and dhikr and so on

Do not enter any suspicious links or links sent by people you may Astahedvuk, always make sure that the link is true, given to him and ensure the safety of letters and words

may Astahedvk hacker by mail by sending email seems like a "Twitter" and requests the password change or re-entry of the account, be aware of it

Give the password to someone you trust, even change the password in the event of arrest you or confiscate your computer, or even informs Mtabaenk in the event of any harm may befall you

note of activating the GPS Tagging property when taking photos and when published in the networking sites they inferred on you and exactly where you may be targeting

considers own Twitter messages in a secure and encrypted, provided used correctly has been published in a report Saybrkov private and thus entitled (your private messages are not private, how do you maintain the

privacy of your private messages on Twitter) ([https://blog.cyberkov.com/?](https://blog.cyberkov.com/?(p=1241)
(p=1241

:Several security-mail when taking pictures and publishing •

(photoswideplayer.jpg

image that today go out of your mobile phone just a picture no longer, but .1
contain a lot of information around you, can extract this information by Exif
Data information on images, such as may be information "location" Always
make sure you disable "location services" camera in your phone through the
.camera settings in Android, or privacy settings in the iPhone

You can also publish false information "for your geographical location," .2
so that it appears that the image has been captured in such and such a
place, a fake website, you can use an application Mapp
(<https://itunes.apple.com/us/app/photo-gps-editor/id471263055?mt=8>) the

iPhone to falsify the geographical location of the image, or apply Photo GPS Editor (<https://itunes.apple.com/us/app/photo-gps-editor/id471263055?mt=8>) also

Here is a short interview about keeping your privacy in the application of Alanstagram which is not recommended for use Facebook for political followers in the collection of information and a bad reputation in the .protection of privacy

Alalkrtony several security when using mobile GSM • - :network Telecommunications

s04.justpaste.it/files/justpaste/d224/a9161498/shutterstock-64274944-//)
(680x400.jpg

It is known that mobile GSM networks are encrypted for the average user .1 only encrypted weak so easily penetrate and eavesdrop on conversations using tools are not worth more than \$ 3000 dollars, so I would prefer not to be used by reporters and journalists and media professionals and the use of .phones encrypted to protect sensitive talks

The use of encrypted phones from a company CryptoPhone .2
(<http://www.cryptophone.de/>) German encoding the talks, but both sides
.must use the same phone to complete secure calls

use a phone BlackPhone (<https://www.blackphone.ch/>) which is running .3
Android, which contains applications to maintain the security of your
.communications such as silent circle (<https://silentcircle.com/>) and others

The use of voice applications VOIP encrypted alternative for GSM .4
.networks have Vsalnaha in a special section of this article

Several mail security at cutting off communications and • - :the Internet

(<s02.justpaste.it/files/justpaste/d224/a9161498/no-signal.jpg/>)

Some states moving at intensification of the protests to cut off
communications and the Internet from the crowds or the crowd or the state
fully Here are some solutions to continue to communicate in the case of the
:Internet and telecommunications were cut

.The use of mobile-related Balstleight for talks or the Internet .1

space use the Internet to access the Internet in isolation from the local .2
provider of Internet

Use Twitter by SMS in case the network Twitter or disconnect from the .3
Internet and the survival of communications block (you must adjust your
(settings for the Twitter-Twitter by SMS text messages

Create Wireless Wifi private internal networks and long-range .4
communication between the groups even if cut off Internet and
.telecommunications

use an application FireChat located for iPhone .5
(<https://itunes.apple.com/kw/app/firechat/id719829352?mt=8>) and Android
([https://play.google.com/store/apps/details?
id=com.opengarden.firechat&hl=en](https://play.google.com/store/apps/details?id=com.opengarden.firechat&hl=en)) to share photos and conversations in
the vicinity of 200 meters and without the need for Internet or call or even
phone segment, where the open (Chat for images and conversations rooms)
accommodate up to 80 people in an internal network, including only and
should attention that the application is not indicated Encryption at the
moment, it should be used only when the Internet and communications cut
.and not permanently

use an application Tin-Can app for the iPhone .6
([https://play.google.com/store/apps/details?
id=com.hubski.com.kvh.tincan&hl=en](https://play.google.com/store/apps/details?id=com.hubski.com.kvh.tincan&hl=en)) and Android
(<https://itunes.apple.com/us/app/tin-can/id312267910?mt=8>) written
.without the need to connect to the Internet or communication networks

use an application The Serval Project for Android .7
([https://play.google.com/store/apps/details?
id=org.servalproject&hl=en](https://play.google.com/store/apps/details?id=org.servalproject&hl=en)) devices, which makes your application is a
station to communicate with other parties using the same application in the
vicinity of 200 meters and the more the number of users increases, the more
the vicinity of the application work, communication is done by internal
numbers such as "Operator" system

use of the devices Walkie Talkie short-range communication via radio .8
".waves, "but it is not encrypted

**Several e-Security to encrypt all your activities when you •
:connect to the Internet**

(s02.justpaste.it/files/justpaste/d224/a9161498/encryption-imgpng.jpg//)

Internet access by mobile is is the most important in the collection of information worker, where your published several statements that run background as well as when you are browsing the Internet sites is not encrypted, taking into account that most of the "Bandwidth" are you using the Internet is not encrypted and can be through analytical and monitor you great information around access, and access the approximate place of your presence to reveal the number of your IP, for example, so always permanently advised encrypts communication using the networks of the VPN when you are connected to the Internet even hide your location and your activities completely for ISP service provider and the security agencies .and intelligence services and others

Use the VPN services and prefer to stay away from the American Arab or .1
.services in this area

Use the service Freedom (http://www.f- .2
secure.com/en/web/home_global/freedome) of VPN phones for the iPhone
from here (https://itunes.apple.com/us/app/f-secure-freedome-
vpn/id771791010?mt=8) and for Android from
(https://play.google.com/store/apps/details?
id=com.fsecure.freedome.vpn.security.privacy.android&hl=en)here, a
service of the Finnish security company F-Secure which is not free, but a
quick control and protect you from spyware and fraudulent websites and so
.on

Or use application Avast SecureLine! From security company Avast .3
(http://www.avast.com/index) can download application for the iPhone from
(https://itunes.apple.com/us/app/secureline-vpn-wifi-security/id793096595?
mt=8)here, and for Android from
(https://play.google.com/store/apps/details?
id=com.avast.android.vpn&hl=en)here, as it can be used for windows
.systems from (http://www.avast.com/secureline-vpn)here

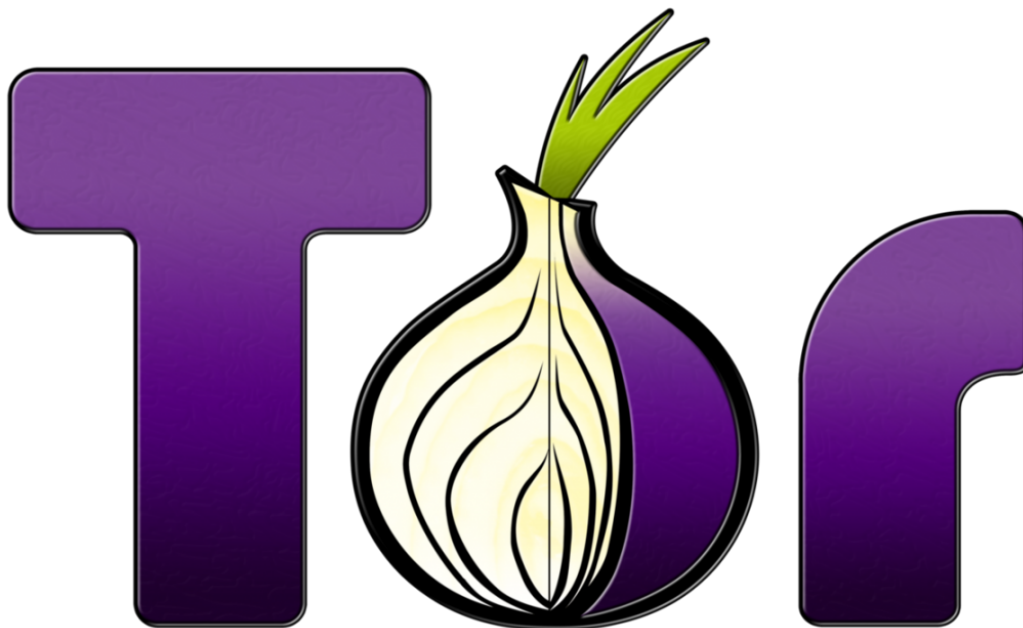

There are also other programs, but the advantages of previous programs
they install the encryption certificate you to contact and control, and in case
of a sudden disconnection is to contact the program automatically giving
.you additional protection

Also must alert: to stop the work program must remove encryption from a
.degree in the iPhone settings

- :Several mail security in the Safe Browsing in Internet •

The browser is the portal to the Internet, used by Web sites to collect a huge
amount of information that is later analysis to monitor your behavior, the
following browsers protects your privacy and encrypt your data to keep you
:away from the eyes of censorship

TorBrowser browser hides your identity and protects you from tracking -1 and you can share information confidentially and encrypted and hidden always advisable if you want to conceal your identity while conducting .Bnchataatk online anonymously does not mean you

(s04.justpaste.it/files/justpaste/d224/a9161498/tor-browser.png/)

For download for iPhone devices from here
(<https://itunes.apple.com/app/id363729560>

Note: There are some countries have addressed the opera company until you cancel encryption and stealth located in OperaMini browser, including .Saudi Arabia, so it is not considered safe to use in Saudi Arabia

Instead, he prefers to use Yandex OperaMini a browser that encrypts communication and open blocked sites the same as the original application OperaMini but the famous Russian yandex company added some .improvements to it

:To download the application Yandex OperaMini from here

For the iPhone from here ([https://itunes.apple.com/us/app/yandex-opera-
\(mini/id480943757?mt=8](https://itunes.apple.com/us/app/yandex-opera-mini/id480943757?mt=8)

For Android from here (<https://play.google.com/store/apps/details?id=com.opera.mini.android.yandex&hl=en>)

Several cyber security to protect files and hardware :encryption in full

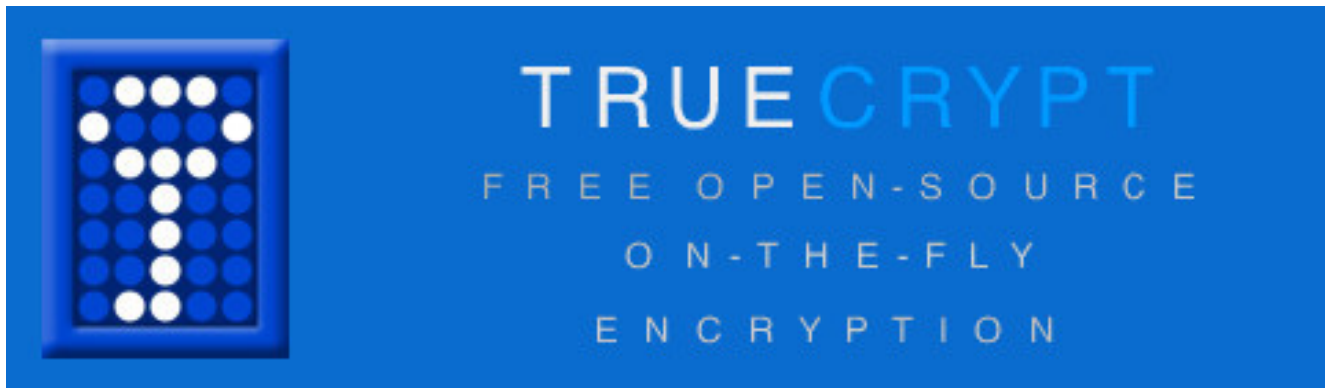

(s02.justpaste.it/files/justpaste/d224/a9161498/lockondoor.jpg//)

The entire device is one of the most important choices encryption for reporters of a private conflict zones when it hardware or forfeiture or loss of equipment, the iPhone will be encrypted once the lock screen and prefer to be the word of a long-secret and not with the four characters, either Android devices Valchwir the optional special security settings , preferably activated the device completely and internal memory, but after taking a backup copy .of the contents of your device in case of any error during encryption

:In whole or in Flash Memory follows encryption tools for laptops

TrueCrypt program: the entire or part of your device encrypts or a group -1 of files in your devices and maintains the confidentiality and prevents .obtained in the event of device loss or confiscated or get it forcibly

(s02.justpaste.it/files/justpaste/d224/a9161498/truecrypt-logo.jpg//)

For download from here

o.com/download_truecrypt/download/352d9625bafddeeaec707274b07c96a

Note: The download version (7.1) of the TrueCrypt program only and do not download new versions (7.2) for the existence of the changes and stop the .encryption properties by developers for unknown reasons

VeraCrypt program: It is based on the TrueCrypt program is that it was -2 developed by a French company and increase the work of the encryption mechanism, which works similar to encrypt files and program the same way as TrueCrypt

(s04.justpaste.it/files/justpaste/d224/a9161498/veracrypt.png//)

(/For download from here (<https://veracrypt.codeplex.com>

Encryption by Windows BitLocker system is available with a number of .3 versions as Microsoft Windows system and you can encrypt the entire device or flash memory encryption or external Hardsk Also, it is suitable to .protect your data

To learn more about BitLocker encryption system from
(<http://www.pcworld.com/article/2308725/a-beginners-guide-to-bitlocker-.windows-built-in-encryption-tool.html>)here

Use hard disks (Hardskat) encrypted stand-alone and without software .4
intervention, such as company discs integral CryptoSSD
(<http://www.integralmemory.com/product-categories/encrypted-ssd>) rapid
containing Merged have encryption chip, or company iStorage datAshur
(<http://www.istorage-uk.com/datashur.php>) Aalvlac Memory Almhvir, and no
doubt there are many other kinds of them dear, including the price, and
when talking in this section I saw it appropriate to talk about an article in the
new independent explains all these types and evaluates, and write it when it
.possible, God willing

(s04.justpaste.it/files/justpaste/d224/a9161498/encryption-cyberkov.jpg/)

:Several mail security in the Instant Safe via e-mail •

E-mail is today from one of the most important means of private communication, and send reports and work meetings, interviews or publishing leaks and so on, and uses many a letter from a company (Google and Microsoft and Yahoo) and that was good in terms of security against hacker attacks, but to Aihamak of Tlss the US government or Google and

Microsoft, which has utilized against you one day, so I prefer to use companies are not American, as well as maintain your privacy and your .personal security

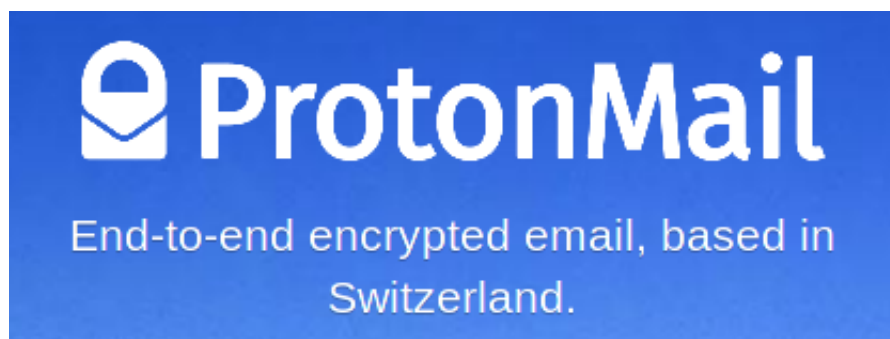

Hushmail service: safe and free e-mail service through which to open an -1 account and start correspondence which ensures service encrypts messages without user intervention lies Service servers in Canada, which is .one of the most secure mail services

(s04.justpaste.it/files/justpaste/d224/a9161498/00010.jpg//)

(/To register from here (<https://www.hushmail.com/signup>

ProtonMail Service: safe and free e-mail service, but new so you should -2 request a lawsuit to open a new account in the service, encrypted High-encrypted and lies servers Service in Switzerland, and are supervised by scientists in physics and encryption of Harvard University and MIT and the European Agency for Nuclear Research, Inc. Saybrkov her private partnership project was supervised and examined to make sure encrypted, and got a recommendation and appreciation from the institutions mentioned .certificate
